

Assignment (Selection Task)

Task: Student Registration System

Create a simple full-stack application.

Frontend

Create a form:

- Name
- Enrollment Number
- Email
- Mobile Number
- Branch

Backend

Create REST APIs:

- Add student
- Get all students

Database

Store records in MySQL.

Technologies(may use)

- Java + Spring Boot
- Angular

OR

- Node.js + Express

OR

- React + Node

The technology is less important than completion.
